C ntinuati n Sh t (PTOL-303) 09/741,208

Application No.

Continuation of 5. does NOT place the application in condition for allowance because:

On page 10 of the applicant's response, two arguments are made as to why the rejection should be withdrawn.

Firstly, the applicant notes the examiner's admission in the earlier action that "... no single reference teaches peer-to-peer exchange of music files between automobiles..." But the examiner notes that it is not necessary for every feature to be taught by a single reference. That is only the requirement for 102b rejections; in this case a 103 reference has been made where music files in autos is taught in Razavi and peer-to-peer exchange of files (including music files) is taught by Fanning. Fanning is then incorporated into Razavi.

Secondly, the applicant states, "the only place ... teaching... a peer-to-peer exchange of music files... is in the applicant's specification." This is untrue. Fanning teaches (column 4, lines 20-25) peer-to-peer action; the files in question may be music files (column 9, lines 20-25), i.e. MP3 audio. As a side-note, Shawn Fanning's NAPSTER software (which is the technology literally protected by the patent) became synonymous with peer-to-peer exchange of music files and attracted national attention as well as millions of users and was a center of the controversy over digital music piracy.
